STATEMENT OF WORK PREDICTIVE POLICING DEPLOYMENT

Predictive Policing SaaS Subscription Agreement Between PredPol, Inc. and the Livermore Police Department August 1, 2014

□ OVERVIEW

PredPol, the predictive policing company, provides command staff, crime analysts, and patrol officers with proven, accurate, easy to use predictions for where and when crime is most likely to occur. This includes property crime, drug crime, gun violence, gang activity, and automobile traffic incidents. Used as an everyday policing tool and for special operations, predictions are generated for each shift and delivered on paper or to any internet-connected mobile device. The predictions are shown on maps as 500 foot by 500 foot boxes, about the size of a large intersection, that officers patrol during their shift when not responding to calls for service or performing other duties.

PredPol's patent-pending, web-based software as a service (SaaS) drives the cloud applications, data pipe applications, and all other crime-related applications that LPD may require. Three types of crime data – type of crime, place of crime, and time of crime – are pushed through a secure internet connection from LPD's RMS to PredPol's servers. Predictions are then generated and made available anytime a user logs in to the system.

Part of this technology will be provided by PredPol under an exclusive license from Santa Clara University in Santa Clara, California, while other aspects of the technology have been created by PredPol itself.

□ TERMS

1. Financial Parameters, Including Discounts:
 - a. For Livermore Police Department, there is a one-time setup fee of \$5,000 and an annual subscription fee of \$31,400.
 - b. Discounts: PredPol has provided LPD discounts off the annual subscription fee of \$46,000 and the one-time setup fee of \$9,000.
 - i. PredPol has provided these discounts because LPD and the Pleasanton Police Department have both agreed to a multi-agency deployment before the end of 2014, because LPD has advised PredPol about the technology landscape in Alameda County and the Bay Area, and because LPD and Pleasanton PD have taken lead positions in deployment of predictive policing.
 - ii. If the Pleasanton Police Department does not agree in writing to deploy PredPol by June 30, 2015, then LPD's multi-agency discount does not

- apply and LPD's Year One annual fee will be \$36,800. The additional balance for Year One would be due July 1, 2015.
- iii. The Year Two annual fee is \$31,400 unless the multi-year discount does not apply, which will make the Year Two annual fee \$36,800.
 - c. There are no additional fees for training, no individual license fees, no need for new hardware or new hiring, and no limit on the number of LPD users or prediction views.
 - d. New features, maintenance, and upgrades for PredPol's crime predictive technology will be provided at no additional cost during the Initial Services Term.
2. Non-Financial Parameters: LPD agrees to *reasonably* support PredPol's deployment and development by doing the following during the term of this Agreement:
- a. Deploy and utilize the PredPol tool and the intelligence it generates;
 - b. Generally support the deployment of any new features/tools, including providing user feedback, as requested by PredPol;
 - c. Provide access to relevant databases and shared databases to which the Agencies have access, pursuant to all applicable laws and access agreements;
 - d. Occasionally respond to inquiries and host visitors from other agencies.
3. Two-Year Initial Services Term & Renewal: This Agreement is for an Initial Services Term of two years with annual payments due according to the terms set forth herein. Renewal following the Initial Services Term will be determined by both Parties in writing sixty (60) days prior to the second anniversary of the Services Commencement Date.

□ SCOPE OF WORK

Scope of Work: PredPol shall provide services, resources, and tools to support a successful implementation of the software tool to support Livermore's efforts to suppress, deter, and reduce crime. The scope of work will include the following:

- Setup of and integration of the PredPol tool into LPD's existing RMS/CAD/data system. Timeline for setup is dependent upon grant of access by LPD to PredPol's technician for installation of the secure data pipeline.
- Opening of a secure data stream from your database to PredPol's computers that provides type of crime, place of crime, and time of crime. Frequency of data update (daily, hourly, every few minutes) is dependent on the degree of access granted to PredPol to stream data provided by LPD.
- Provide electronic transfer of 500' x 500' predictive locations (latitude and longitude data) identified by PredPol to LPD for electronic consumption by LPD's computer systems. The details of the data exchange will be determined through conversations with your information technology staff and depend on your existing RMS/CAD/Data system and mapping technology, if any.
- Access to 3, 7, 14 and 28 day historical crime mapping for crime types that LPD wishes the tool to predict.
- Provide command staff, supervisors, and analysts with training and best practices.
- Provide tools that track the effectiveness of predictive boxes and patrols on crime levels in Livermore.
- Full access to the tool, including unlimited users, unlimited prediction views, and report generation.
- Provide phone, online, and email support for technical and operational use.
- Inclusion of feature updates at no additional charge during the subscription term.

□ DEPLOYMENT STEPS AND TIME SCHEDULE

Implementation of predictive policing in LPD will include the following steps and proposed schedule:

- Setup of and integration of the PredPol tool into LPD's existing RMS/CAD/Data system.

Timeline for setup is dependent upon grant of access by LPD to PredPol's technician for installation of the data pipeline. If an agency provides initial data transfer within two weeks of an agreement, the PredPol system is usually ready to generate predictive maps within 45 days of signing.

- **Installation of a data pipe from LPD to the PredPol SaaS.**
Frequency of data update (daily, hourly) is dependent on the degree of access granted to PredPol to stream data from LPD.
- **Electronic transfer of 500 square foot predictive locations (latitude and longitude data) identified by PredPol to LPD.**
The details of the data exchange will be determined through conversations with LPD's information technology staff and depend on LPD's existing RMS/CAD/Data system and its existing mapping technology, if any.
- **Training.**
PredPol recommends a "train the trainers" approach for command staff, supervisors, and analysts once the system goes live. This provides a better understanding of the system and allows new officers to be trained when they start work rather than waiting to coordinate scheduling with PredPol every time a new officer comes aboard. Training usually takes less than two hours, including questions and answers. PredPol always provides client support and training materials online and is available to train officers via live web sessions.
